Dear Friends,

It is a pleasure to present the IFMA Foundation 2020-2021 annual report. The COVID 19 pandemic created a global experience like no other. Time and time again, facilities management (FM) professionals have proven extraordinary performance above and beyond expectations. Facility managers adapted to changes that impacted people’s lives. Examples of the impact include online work, maintaining mission-critical facilities, and delivering safe and healthy facilities for essential operations. FMs were a constant and necessary component of our daily lives.

The IFMA Foundation also adapted with webinars, publications, and virtual events. We grew programs and increased opportunities with partners across communities to deliver on our mission.

The IFMA Foundation works for the public good to the mission of promoting education for the facility management profession around the world and making FM a Career of Choice.

Sincerely,

Joe Archie
2020 IFMA Foundation Chair

The work of the Foundation is possible through the generous support of our friends and donors. The dedication of individuals, IFMA Chapters, Councils, and Communities, our GWI Advisors, the IFMA Board of Directors, the incredible IFMA Foundation Board of Trustees, and the most remarkable IFMA Foundation staff Christina Gonzales and Diane Levine.

Sincerely,

Joe Archie
Our Story So Far

**OUR MISSION**

The IFMA Foundation was established in 1990 as a non-profit 501(c)(3) corporation and a separate entity from IFMA. As a charity, the IFMA Foundation relies solely on financial contributions and donations to support its mission and vision.

The Foundation’s mission is to Make FM a Career of Choice and is dedicated to promoting education for the advancement of the facility management profession around the world.

The benefits of a Facility Management career is IFMA Foundation’s strongest message. At a high level, the primary message is:

- Millions of FM jobs to be filled worldwide
- Industry-recognized training
- Nearly 100% placement for people with the right coursework
- Secure jobs and salaries
- Broad range of transferable skills
- Opportunity to impact sustainability and work with clean energy technology

“To live in a world where FM is a career of choice inspiring and shaping the future of the built environment.”
Global Workforce Initiative

The Global Workforce Initiative addresses the triple bottom line of Economy, Equity, and Environment. Meeting this demand is critical to the energy efficiency of the built environment, reducing greenhouse gas emissions, increasing economic productivity of these buildings, and providing employment opportunities in the profession of facility management.
The FM Talent Development Pipeline (TDP) Programs support and expand FM Accredited Degree Programs; build awareness of FM as a career of choice; develop FM educational programs at community and high school levels; and create models to recreate in other locations.
In 2020, The IFMA Foundation became the Lead ABET Society for Facility Management accredited degree program criteria. Facility Management degree programs are accredited by the Applied and Natural Sciences Accreditation Commission of ABET www.abet.org.

Knowledge Management

2020 was a time of growth and change for FMs and their facilities. The IFMA Foundation heard the call and lifted Knowledge Management to the forefront of the epidemic. Our goal, to provide quality and impactful information to help those currently within and protect those returning to the workplace. Our publications are authored by highly qualified facility management professionals.

1

Pandemic Manual
Planning and responding to a global health crisis for facility professionals

- The IFMA Foundation published a new pandemic guide, for free, to companies and professionals planning to open their facilities and resume operations.
- Nearly 6,000 downloads and growing
- Won the 2020 IFMA Book Author of the Year Award at World Workplace.

2

Work On The Move 3

- FREE preview copy available
- Nearly 400 downloads and counting
- Full book launch will be October 2021
- A team of nineteen industry experts are collaborating to produce the book, covering topics that include the workplace, diversity, Equity, and business, sustainability, and technology

3

Applying What Scientist Know About Where and How People Work Best

- An update to the first edition, including the research that has been conducted in the social and physical sciences that is applicable by managers and designers.
- This will equip workplace professional with successful case studies applicable to the needs of their organization.
REVENUE

- Contributions: 58.5%
- Fundraising/Events: 21.8%
- Programs: 19.7%

EXPENSES

- Programs: 52.7%
- Management & General: 26.8%
- Fundraising/Events: 20.5%
